

---

# The ICA

- Industry association - established 1998
  - Working to promote use of high efficiency CHP world-wide, through:
    - Promotion of competitive energy markets which remove barriers to CHP
    - Promotion of a robust response to climate change
    - Assisting development of national and regional CHP organisations throughout the world
    - Advocacy to international energy, environmental and financial institutions
-

# Current market status

---

# Conference Themes

- CHP is not an end - it is a means to an end.
  - Why CHP?:
    - Low cost energy
    - Economic development
    - Environmental gain
  - Deregulation - getting the framework right
  - Radical change in the energy market
-
